You can also reach us on our toll free line at **1-800-432-0224**. We do not recommend (for security) sending orders over the Internet.

READY MADE STOMASHIELD

Stomashield is an effective and disposable filtering cover specifically designed for stoma protection. It is neat looking, easily conceal able, and can be worn night and day. PLUS StomaShield is so light, that you will forget you are wearing it and it takes only seconds to change. Medmart's StomaShield is self-adhering, made possible by a non-irritating, hypoallergic adhesive tape. It comes to you in a heal-sealed bag.

MAKE-YOUR OWN STOMASHIELD

If the "ready Made" StomaShield is too small for your use, then you can order Medmart's Make-your-own Stomashield. Originally requested by hospitals and Laryngectomees that could not use standard "ready made" Stomashields because of stoma size, shape, or neck location, our "Make-your-own" Stomashields are now also available to all laryngectomees.

Make-your-own stomashields has been developed to suit just you, and at a greatly reduced cost, but is as effective as our standard Stomashield. The package includes extra wide strips of our StomaShield filtering material plus a roll of our non-irritating, hypoallergic medical double adhesive tape for attaching the StomaShield to your neck. Simply cut the StomaShield material to whatever size and shape you want, attach the tape to the foam and peel off the release cover on the other side of the tape to adhere to your skin--and that's all there is to it.
